446D Backhoe Loader

Big power for big performance.

Pilot Operated Controls

- ✓ Optional pilot operated joystick controls provide smooth modulation and are ergonomically designed for low effort control and operator comfort. As a result of this control design, legroom is increased and the rearward viewing area is greater. **pg. 4**

Loader Performance

- ✓ The loader delivers maximum lift and breakout forces, fast cycle times and high lift capacity. **pg. 5**

Backhoe Performance

- ✓ Superior bucket rotation and forces, an excavator-style backhoe boom and an optional extendible stick combine for high productivity levels. **pg. 6**

Operator Station

- ✓ The 446D operator environment is ergonomically designed to create a comfortable work area with easy-to-use machine controls that reduce operator fatigue, increase efficiency and productivity. **pg. 10**

Additional Features

Other benefits contribute to 446D efficiency and productivity. **pg. 12**

When the job demands truly BIG power, the Cat 446D is ready. The most demanding backhoe loader jobs like road building and bridge work are just what the 446D is designed for.
