Valves – Exhaust-Intake	12
Water Pump	32

The information contained in this manual was obtained from reliable sources and is believed to be accurate as of the time of printing. Naturally, its continuing accuracy cannot be guaranteed. Industrial Engine and Turbine Division of Ford Motor Company reserves the right to discontinue models at any time, or change specifications or design, without notice and without incurring obligation.

GENERAL INFORMATION

This Ford Industrial Engine and Power Unit parts list has been prepared so as to afford quick and easy identification and ordering of genuine Ford parts for the year 1965 forward.

Models manufactured to customer specifications are designated S.O. (Special Option) and are identified by an S.O. number following the model number. When ordering parts always furnish the complete model number, option (S.O.) number and serial number. Your Industrial Engine Distributor has complete model and S.O. information and is in a position to service substituted or peculiar components for Special Option models.

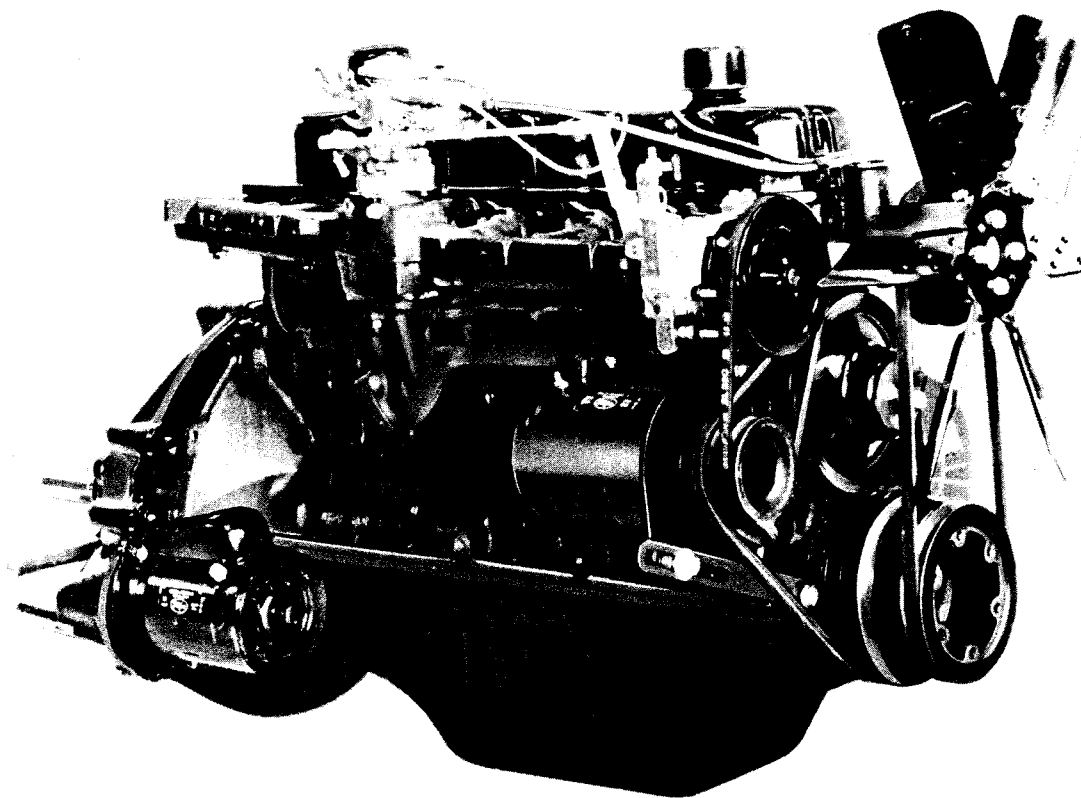

To obtain Ford Industrial engines and power units, as well as peculiar parts for such units, order directly from your authorized Ford Industrial Power Products Distributor. However, most normal replacement parts for 6-cylinder gasoline engines are available from local Ford Vehicle Dealer's stock. A Distributor's list, Form IET 194-101, enclosed in a protective envelope, is included with each engine or power unit.

The following procedure is recommended for locating parts in this parts list:

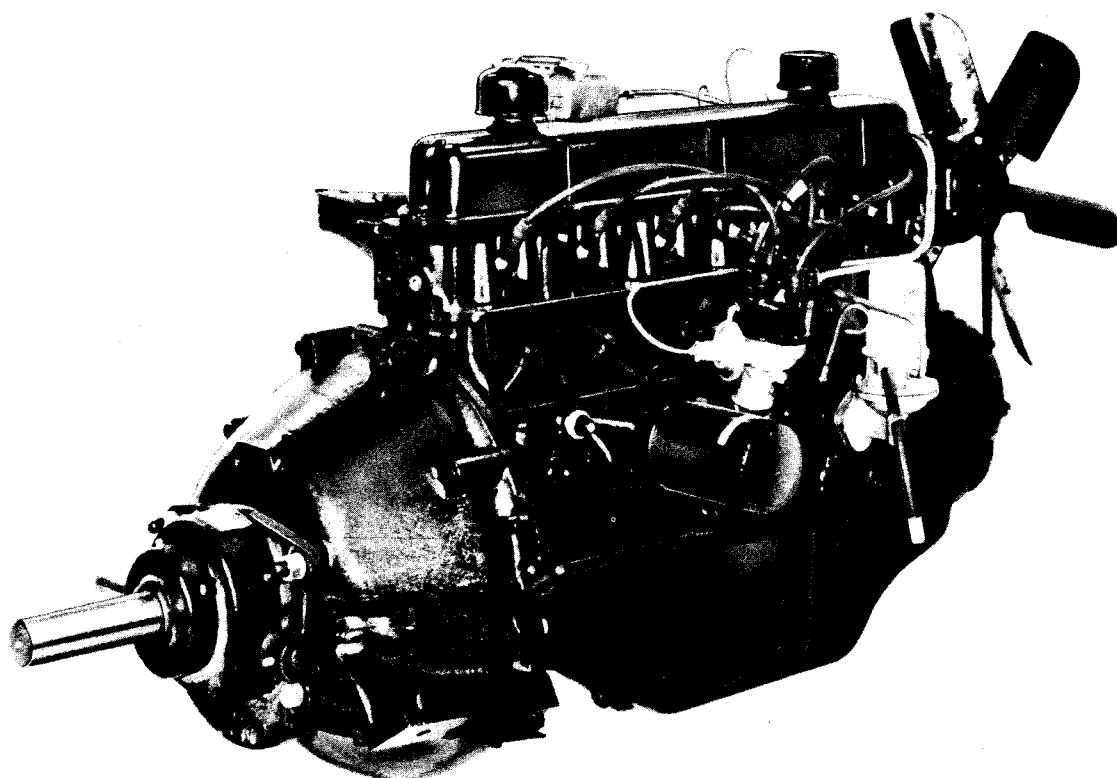

A gasket for a valve rocker arm cover is required for a 240 engine and the part number is not known.

1. Refer to the quick reference index, referring to engine.
2. The first series of pages in the engine section contains illustrations.
3. Refer to the appropriate illustration page (in this case, page 12) containing an exploded view of the valve, push rods, and rocker arm cover. The basic number for the gasket is identified as 6584.
4. Parts are listed in numerical sequence throughout this parts list except for peculiar assemblies which have all the necessary parts listed below the assembly.
5. Refer to the appropriate text page (which in this case is 13) and select the gasket for the 240 engine: C8AZ-6584-A.

When ordering parts, always provide the complete part number, serial number, model, and special option number. Specify model of the unit and how shipment is to be made — freight, air freight, express, air express, parcel post, or air parcel post.
