Setting of machine monitor

1. Operating method of machine monitor (Items common to all settings and adjustments)

When implementing the initial setting or option setting of the sensor, you must access the service mode of the machine monitor before starting the operation.

1-1. How to enter "Service Menu"

1-1-1. Operating method

Turn on the starting switch of the machine to turn on the machine monitor power. While the machine monitor's LCD unit is showing the standard service meter screen or the alarm screen, the screen moves to the service mode screen by pushing the "▲1", "▲2", and "AUTO3" numeral keys in order while holding down the DOWN (▼) switch.

Standard screen

Switch box

Service Menu

Remarks:
If the starting switch is turned OFF while the machine monitor is in the "Service Menu", the screen returns to the normal service meter screen or warning screen when the starting switch is turned ON next time.
