**LANCIA LYBRA**

Lancia I.C.S. with navigator

**This is the cut pages sample. Download all 93 page(s) at: [ManualPlace.com](http://ManualPlace.com)**

**Dear Customer,**

This supplement is an integral part of the Owner Handbook and describes all the functions of the Lancia I.C.S. with navigator and cellular phone (optional for versions/markets where applicable).

Refer to the Owner Handbook for the description and operation of the Check Control system.

Overleaf you will find the system control panel for your reference.

The third page of the cover you will find a pocket where to keep the quick reference guide which summarises the main functions for immediate use of the system. To learn how to use all the functions of the Lancia I.C.S. system you should however read through the whole of this supplement.

- 1** Keys from **1** to **6**:
  - 2** - selecting memorised broadcasters

## IMPORTANT INSTRUCTIONS FOR USE AND SAFETY AND TRAFFIC SAFETY

The Lancia I.C.S. (Integrated Control System) makes the driver's task easier in controlling the main functions of the vehicle.

In order to avoid creating danger for yourself and for others when using your I.C.S., please pay attention to the following points:

- use of the cell phone is prohibited near explosive substances;
- the I.C.S. system must be used when you are in full control of your car; in the event of doubt, stop to carry out the different operations.

The navigation system allows you to reach your destination through the traffic and indicates to you any change of route memorised on the navigation CD. In fact the system takes account of all information concerning the roads when calculating the route, advising the best way. However, it does not take into consideration traffic conditions or sudden obstructions or any other inconvenience.

The Lancia navigation system helps driver while he drives, by suggesting vocally or graphically, the optimum routing to reach his preset destination.

**WARNING: Navigation system suggestions do not excuse driver from his full responsibilities due to his driving behaviour and to his compliance with road and other traffic regulations.**

**The responsibility for road safety always lies with vehicle driver, and it falls on him in any case.**

All manoeuvres must be carried out abiding by the highway code, regardless of the advice given by the navigation system. Should you leave the recommended route, the I.C.S. system will calculate a new one for you and suggest it to you.

## I.C.S.: LANCIA ENHANCED COMFORT AND FUNCTIONALITY

The I.C.S. controls and offers information for the following systems:

- On-board computer
- Sound system with tape and CD player (where fitted)
- Cell phone
- Navigator.

The interface is the multifunction information display for all the integrated components. The I.C.S. offers optimum functionality, allowing the driver to interactively receive clear instructions structured according to the single groups of the I.C.S. units.

## GENERAL INSTRUCTIONS FOR USE

The I.C.S. can easily be used by both driver and passenger through the multifunctional information display.

### Multifunctional information display

The colour display comprises a 5" LCD screen (approx. 7.5 x 10.3 cm) with active matrix. During the day the display brightness can be set in relation to the brightness of the passenger compartment, while during the night, with the vehicle lighting system working, the colours used for the screen can be adapted to optimise display visibility.

### Controls

The I.C.S. controls and functions are described in the pocket inside the cover. Getting acquainted with a few controls will allow you to use all the integrated functions completely integrate.

### Use of the I.C.S.

The I.C.S. display shows the single pages of the functions of the integrated units. Each page displays on

the screen information about the current system status. Using the cursor you can select the elements and items of the lists required and carry out the functions selected. The cursor is moved using the knob **20** on the right bottom part of the I.C.S.. Lightly pressing the knob **20** the corresponding function selected activated.

### Main function keys **15, 16, 17, 18 and 19**

It is possible at all times, regardless of the level the system is in, to pass from one main function to another.

Returning to the starting function returns to the same point and same level as before.

From a lower function page, you can move to the first page pressing the main function key of the function.

### Selecting "Go back"

To move from one function page to the previous page displayed, select "Go back".

### Canceling selection of the list

If a list is selected by mistake, this can be corrected as follows:

– If you want to carry out other operations after exiting the list, select either the last item selected or any other item, staying in the same function page;

– once a determinate function has been performed automatically (for example saving settings) press the main function key of the current function **15, 16, 17, 18** and **19**, thereby returning to the corresponding first function page.

### Display darkening function

The LIGHT key **26** switches the I.C.S. display on or off.

### *Canceling or suspending the darkening function*

Starting from the dark screen:

– with the main function keys **15, 16, 17, 18** and **19** the screen lights up and the main function selected is activated, regardless of the previous page setting;

## Lancia Lybra Ics Guide

Full download: <http://ManualPlace.com/download/Lancia-Lybra-Ics-on-off>

knob **20** the screen lights up showing the function page displayed previously;

– with all the other keys or with the volume control **24** the screen is darkened when performing the associated function;

– if the limits set are exceeded, the limits screen appears for approx. 3 seconds, followed by darkening of the screen.

### “Correct” function and correction field “C”

To correct a selection, select the item and use the knob **20** with two different times:

– for less than 1 second: to delete the last entries;

– for more than 1 second: to delete the contents of the entry field.

## TURNING THE I.C.S. ON/OFF AND STAND-BY FEATURE

### Turning the engine on/off

The I.C.S. is turned on and off automatically turning the ignition key to **MAR** or **STOP** respectively (**fig. 1**).

### Through the volume control (14)

The I.C.S. is turned on and off (also with the ignition key off) pressing the knob **14**.

With the ignition disabled, the I.C.S. automatically turns off after 20 minutes, to avoid draining the battery.

fig. 1

## Stand-by feature

The stand-by operating condition corresponds to dark screen and volume off.

During operation and with the ignition on, the I.C.S. can be set to stand-by pressing knob **14**. In this condition the system works invisibly and the telephone is ready to receive a call.

If a limit activated is exceeded during stand-by the corresponding warning message is displayed.

### Switching the I.C.S. on again

To switch the I.C.S. on again, proceed in one of the following ways:

- press knob **14**;
- answer a phone call pressing the key **13**;
- press one of the main function keys **15**, **16**, **17**, **18** and **19**;
- press the MAP key **25**;
- press or turn knob **20**;
