

**TABLE
OF
FLASHCODES
FOR FAULT MEMORIES**

Note:

For notes on setting and repair of individual systems please consult the Repair Manuals or the relevant Service Information sheets.

Notes/additions

Index

ABS/ASR

⇒ 2E Bosch	Page	4 - 5
⇒ 3E Bosch	Page	6 - 7
⇒ 2M Bosch	Page	8 - 9
⇒ 2M Stage 1 Bosch	Page	10 - 11
⇒ CI 12 Bosch	Page	12 - 15
⇒ Knorr	Page	16 - 17
⇒ Wabco "C"	Page	18 - 21

Running gear:

⇒ ECAS, buses	Page	22 - 24
⇒ ECAS, trucks	Page	26 - 27
⇒ EFR running gear control, trucks	Page	28 - 30

Gearboxes:

⇒ Automated pre-selector shift (AVS)	Page	40 - 41
⇒ Renk Doromat	Page	42 - 43
⇒ SAMT B	Page	44 - 45
⇒ Voith-Diwa 3	Page	46 - 47
⇒ Voith retarder	Page	48 - 49
⇒ ZF HP 500	Page	52 - 54
⇒ ZF retarder (Intarder)	Page	50 - 51

Heating/air-conditioning

⇒ D1LCC/D3LCC, Eberspächer	Page	32 - 33
⇒ Heater controls, Dreiba	Page	34 - 35
⇒ Air-conditioner, Behr	Page	36 - 37
⇒ Heater/air-conditioner control, Wabco (ATC)	Page	38 - 39
⇒ Airtop 2000, Webasto	Page	31

Engine:

⇒ EDC M7	Page	56 - 57
⇒ EDC MS5	Page	58 - 59
⇒ EMS 3.3	Page	55
⇒ Speed limiter VDO AGB-S	Page	60 - 61
⇒ Air injection, Wabco	Page	62

Door control, IFE	Page	25
---	------	----

BOSCH ABS/ASR 2E

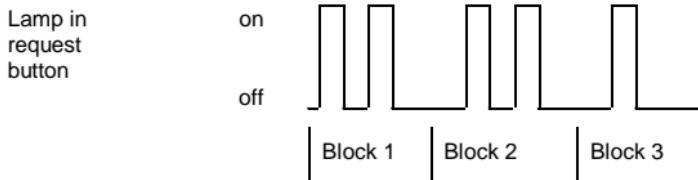

Reading out the fault memory

- Switch off ignition and connect up request button
- Switch on ignition and press button for more than 1 second

The fault codes are emitted in three blocks. The first block indicates which control unit status (configuration) is set. In the second and third blocks the faults in the diagonals FL/RR (second block) and FR/RL (third block) can be read out.

Pause between flashes	approx. 0.5 s
Duration of flashes	approx. 0.5 s
Pause between individual blocks	approx. 1.5 s

Example of flashcode: Flashcode 2 in Block 1 for an ABS unit,
flashcode 2 in Block 2 and flashcode 1 in
Block 3.

Erasing the fault memory

- Switch off ignition and connect up request button
- Press button and keep it pressed
- Switch on ignition and release button after > 3 seconds

	Flashcode
ABS unit	2
ABS unit with ASR engine control (not an MAN application)	3
ABS unit with ASR brake control (not an MAN application)	4
ABS unit with ASR brake and engine control	5

Flashcodes 3 and 4 may be emitted if components are not connected up or are defective.

Block 2 (FL/RR) and Block 3 (FR/RL):

	Flashcode
Fault type	
No fault	1
Control unit defective	2
Speed sensor signal path:	
⇒ front: inadmissible gap	3
⇒ rear: inadmissible gap	4
⇒ front: crack or short-circuit	6
⇒ rear: crack or short-circuit	7
Undervoltage, or relay for pressure control valve cannot be triggered	9
Pressure control valve signal path:	
⇒ front	10
⇒ rear	11
Relay for pressure control valve cannot switch (sticking)	13
Signal path for ASR solenoid valve	14

Connection diagram for request button

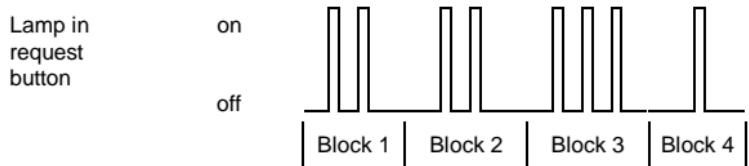

BOSCH ABS/ASR 3E

Reading out the fault memory

- Switch off ignition and connect up request button
- Switch on ignition
- Press button for > 2 seconds

Blocks 1 and 2 indicate the configuration of the control unit. In Blocks 3 and 4 the faults in the diagonals FL/CR/RL (Block 3) and FR/CL/RR (Block 4) can be read out.

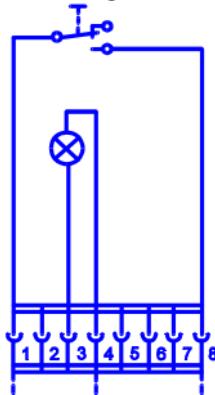

Example of flashcode: Flashcode 2 in Block 1, Flashcode 2 in Block 2, Flashcode 3 in Block 3 and Flashcode 1 in Block 4.

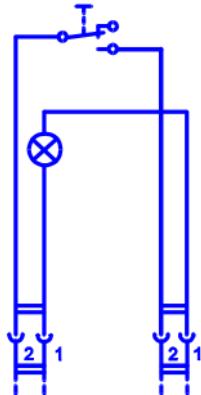

Erasing the fault memory

- Switch off ignition and connect up request button
- Press button and keep it pressed
- Switch on ignition and release button after > 3 seconds
