## Engine control with MR-PLD

---

**ECU**

**Manual**

## Environment protection

DaimlerChrysler professes itself to an integrated environmental protection, which sets at the causes and on the environment into the business decisions includes all effects of the production processes and the product. Goals are the economical employment of resources and careful handling the natural bases of life, whose preservation serves humans and nature.

Printed in Germany changes of technical details of the controllers and engines opposite the data and illustrations of the available manual are reserved.

Reproduction, duplication or translation, also in part, are not permitted without written permission.

Editorship conclusion:  
Customer service Powertrain Business unit PBE/MSS Responsible for contents: PBE/DEE

Printed on free from chlorine bleached paper

Document name: **PRODUKT DOCUMENTATION MR-PLD**

Project: DC - MR-PLD

Usage: Generally accessible

Validity: ECU versions C3 to D21

Pages: 150

File name: Product documentation MR-PLD\_1.1.pdf

3.5.3. Sensor system of the PLD engine control unit (MR-PLD).....	51
3.5.3.1. Control unit internal sensors .....	51
3.5.3.2. Control unit external sensors.....	51
3.5.3.3. Active sensors .....	51
3.5.3.4. Passive sensors .....	52
3.5.3.5. Temperature sensors .....	52
3.5.3.6. Passive oil pressure .....	53
3.5.3.7. Oil level .....	54
3.5.3.8. Camshaft / crankshaft position (inductive).....	55
3.5.3.9. Booster speed 1 / 2.....	55
3.5.3.10. Fan speed.....	56
3.5.4. Digital inputs.....	57
3.5.4.1. Ignition (Terminal 15).....	57
3.5.4.2. Terminal 50 .....	57
3.5.4.3. Service button start/stop .....	58
3.5.4.4. Oil separator.....	59
3.5.5. Proportional valve control.....	60
3.5.5.1. Functional assignment of proportional valves/hardware status D2.1 .....	61
3.5.5.2. Principle block diagram proportional valve control /hardware status D2.1.....	62
3.5.5.3. Functional assignment of the proportional valves/hardware status C3..C6 .....	63
3.5.5.4. Principle block diagram proportional valve control/hardware status C3..C6.....	64
3.5.6. Starter control through the MR-PLD .....	65
3.5.6.1. Main path (self-locking) .....	65
3.5.6.2. Auxiliary path (self conducting).....	65
3.5.6.3. Principle block diagram starter control .....	66
3.5.6.4. Starter relay.....	66
3.5.6.5. Principle block diagram of safety concept of JE-starter .....	67
3.5.7. Serial communication interfaces .....	68

3.5.7.1. CAN data bus (2-wire-interface, standard: ISO 11992) .....	68
3.5.7.2. Diagnostic line (standard: ISO 9141) .....	69
3.5.7.3. Classification of the injector valves .....	69
3.6. Configuration possibilities of the MR-PLD .....	70
3.6.1. Fan type.....	70
3.6.1.1. General connection .....	70
3.6.1.2. Pin assignment of the proportional valve-power stages (PV/Prop) for fan control. ....	70
3.6.1.2.1. Type 0/Linning-clutch (on highway/two-stage) .....	70
3.6.1.2.2. Type 1/Linning-clutch (off highway/two-stage) .....	70
3.6.1.2.2.1. Configuration / fan switch-on threshold (type 1) .....	70
3.6.1.2.3. Type 2 /electrically controlled Viscous-fan .....	72
3.6.1.2.4. Type 3 /Hydrostatic Fan .....	73
3.6.1.2.5. Type 4/Horton-clutch .....	74
3.6.1.2.6. Type 5/one Hydrostatic-fan.....	75
3.6.1.2.7. Type 6/two Hydrostatic-fans.....	76
3.6.2. Starter control .....	77
3.6.2.1. JE-starter .....	77
3.6.2.2. KB-starter.....	78
3.6.2.2.1. KB-starter with starter solenoid relay (2 A) .....	78
3.6.2.2.2. KB-starter without Starter Solenoid Relay (2 A) .....	79
3.6.3. Oil pans .....	80
<b>4. Diagnosis .....</b>	<b>81</b>
4.1. Measured values .....	81
4.1.1. Analogue measured values .....	81
4.1.2. Binary measured values .....	83
4.2. Serial diagnosis interfaces .....	86
4.2.1. Diagnostic line .....	86
4.2.1.1. Fault memory .....	86
4.2.1.2. Operating modes .....	86
4.2.2. CAN data bus systems.....	87
4.2.2.1. Engine-CAN (ISO 11992) .....	87
4.2.2.2. Vehicle CAN .....	87
4.2.3. SAE J1587/SAE J1708 (USA- and partly NAFTA-market).....	88
4.2.4. Configuration of diagnostic interface.....	88
4.2.4.1. MB-truck / Brazil.....	89
4.2.4.2. Europe (ADM / not MB-trucks).....	90
4.2.4.3. Europe (ADM2 / not MB-Trucks).....	91
4.2.4.4. USA- and partly NAFTA-market .....	92
4.2.5. Diagnosis interface/software description .....	93
4.2.5.1. Fault memory structure .....	93
4.2.5.2. Ground switching.....	93
4.3. Diagnosis unit & application.....	94
4.3.1. minidiag2 .....	94
4.3.1.1. Display/delete fault code memory .....	94
4.3.1.2. Testing routines.....	97
4.3.1.2.1. Voltmeter function.....	97
4.3.1.2.2. Cylinder cutoff.....	98
4.3.1.2.3. Compression check.....	99
4.3.1.2.4. Idle speed balance (hot engine!).....	100
4.3.1.2.5. Impact delay time .....	101

**5. Parameters (minidiag2)..... 142**

5.1. MR-PLD Diagnosis version 3 to 5 (up-/download)..... 142

5.2. MR-PLD Diagnosis from version 6 (single parameters)..... 146

A listing follows in the project "MR-PLD" used abbreviations.

Abbreviation	Meaning	Abbreviation	Meaning
ABS	Anti-lock Braking System	LRR	Engine-Smoothness Control
ADR / PTO	PTO speed control / Power Take-off	LK	Slight Vehicle Class (MB-NFZ)
		LS	Low Speed (CAN)
ATG / AT	Automated Transmission	MB	Mercedes Benz
AVD	Compression check	MBR	Engine Brake
BGR	Limitations	<b>MR-PLD</b>	Engine control (Pump-Line-Nozzle System)
BK	exhaust flap		
BR	Engine Type Series (e. g. BR900)		
CAN	Controller Area Network	MS / MTS	Engine protection
		MV	Magnetic Valve
EGR	Exhaust Gas Recirculation	MZA	Mechanical Additional Boost
EMV	Electro-Magnetical-Impulse	n.d.	not difined
EOL	End Of Line		
EZA	Individual cylinder adaption	NFZ	Commercial Vehicle
FB	Start Of Injection	NW	Camshaft
FDOK	Vehicle Documentation System	OM	Oel Engine
FLA	Flame Start Unit	OT / TDC	Top Dead Centre
		PFA	Particle Filter System
<b>FRE</b>	Vehicle control (e. g. VCU, ADM, ADM2, UCV, FR/FMR)	PID	Parameter Identifier
FRT	Free Running Telegramm		
FSP		PV / Prop	Proportional Valve
FW	Injection Delivery Angle	PWM	Pulse Width Modulated
GMA	Basic Moment Adaption	SEG	Segment
HB	High Byte	SG / Stg. / ECU	Electronical Control Unit
		s.n.v.	signal not available
HW	HardWare	SK	Heavy Vehicle Class (MB-NFZ)
ID	IDentifier	STG / MA	Manual Transmission
IES	Intigrated Electronic System	SW	SoftWare
INS / ICU3	Dashboard	TN	(CAN) Attendant
IMO	Industrial Engine (Off-Highway)	TPC	TransPonderCode
KD	Decompression Valve	UT	Bottom Dead Centre
		VTG	Variable Geometry Turbo
		WS	Service System
		WSP	Immobilizer
K-Line	Communication Line (serial)	ZYL / CYL	Cylinder
KW	Crankshaft		
LB	Low Byte		
LL / LLR	Idle / Idle Control
