

**Model 387
Instrument System
Service Manual**

Document Number 072-40245

Rev. D

Every effort has been made to keep the information in this document current and accurate as of the date of publication or revision. However, no guarantee is given or implied that the document is error-free or that it is accurate with regard to any specification. AMETEK Dixson reserves the right to modify product designs and specifications without notice.

Revision Table

Revision	Date	Description
	01/27/99	Initial release.
A	05/14/99	Changed all occurrences of "2100" to "387", and of "self test" to "initialization"; Fig. 5-22, corrected pin designations on J3 illustration.
B	09/28/99	Added Chapter 6, "Using the Handheld Diagnostic Tool"; removed all references to PTM/VTM replacement and to the ABS system; improved Pyrometer troubleshooting instructions; updated Warning Messages tables to reflect current configuration; various other updates and changes resulting from Engineering Dept. review.
C	03/01/04	Updated and renamed Figure 5-16.
D	01/01/07	Removed contact information.

Model 387 Instrument System Service Manual

Table of Contents

1 Introduction	1-1
1.1 Purpose and Scope	1-1
1.2 How To Use This Manual	1-1
1.3 System Components	1-2
1.4 What Makes the Model 387 Instrument System Different	1-2
2 Operation	2-1
2.1 Activating the Instrumentation	2-1
2.2 Select/Reset Switch	2-1
2.3 Speedometer with Integral Message Center	2-1
2.4 Using the Speedometer Message Center	2-2
2.4.1 Clock Operation	2-2
2.4.2 Trip Odometer Operation	2-3
2.4.3 Clock Alarm Operations	2-3
2.5 Warning Alarms	2-3
2.5.1 Red Warning LEDs	2-3
2.5.2 Vehicle Safety Warning Messages	2-4
2.5.3 System Fault Messages	2-4
3 Functional Description	3-1
3.1 The Interface Module	3-2
3.1.1 Pressure and Vacuum Inputs	3-2
3.1.2 Transducer Modules	3-3
3.1.2.1 Pressure Transducer Module	3-3
3.1.2.2 Vacuum Transducer Module (VTM)	3-4
3.1.3 Vacuum/Pressure and Pressure/Vacuum Transducer Modules	3-4
3.2 J1708 Data Bus	3-4
3.3 Electronic Control Units	3-5
3.4 Speedometer with Integrated Message Center	3-5
3.4.1 Select and Reset Switches	3-6
3.4.2 Power Take-Off (PTO) Input	3-6
3.4.3 Two-Speed Axle Input	3-6
3.5 Diagnostic Capabilities	3-6
3.5.1 Power-On Initialization	3-6
3.5.2 Diagnostic Connector	3-7
3.6 Private Data Bus	3-7
3.6.1 Five-Wire Cable Assemblies	3-7
3.6.2 Two-Inch Gauges	3-7
3.6.3 J1708 Data Bus and Private-Bus-Driven Gauges	3-8

3.6.4 Tachometer	3-8
3.6.4.1 Ammeter.....	3-9
3.6.4.2 Voltmeter	3-10
3.6.4.3 Pyrometer.....	3-11
3.6.4.4 Transmission and Axle Temperature Gauges.....	3-12
3.6.4.5 Fuel Level.....	3-13
3.7 Backlighting	3-13

4 Service Procedures 4-1

4.1 Some Important Dos and Don'ts	4-1
4.2 Replacing the Speedometer and Tachometer.	4-1
4.3 Servicing the Two-Inch Gauges	4-2
4.3.1 Removal and Reinstallation	4-2
4.3.2 Disassembling a Two-Inch Gauge	4-3
4.3.3 Reassembling a Two-Inch Gauge	4-4
4.4 Reprogramming a Two-Inch Gauge.	4-6
4.5 Servicing the Interface Module	4-6
4.5.1 Removing the Interface Module	4-6
4.5.2 Reinstalling the Interface Module	4-6
4.5.3 Reprogramming the Interface Module.	4-6
4.6 Spare Parts Listing.	4-7

5 Troubleshooting Procedures 5-1

5.1 Required Test Equipment.	5-1
5.2 Troubleshooting Procedure Start Point.	5-2
5.2.1 The Initialization.	5-3
5.3 Troubleshooting Procedures for Two-Inch Gauges	5-4
5.3.1 Two-Inch Gauge Fails Initialization, No Pointer Movement, LED Never Lights.	5-5
5.3.2 Two-Inch Gauge Passes Initialization but LED Flashes.	5-6
5.3.2.1 Air and Fuel Pressure Gauges	5-7
5.3.2.2 Temperature Gauges.....	5-9
5.3.2.3 J1708 Data Bus Gauges.....	5-11
5.3.2.4 Vacuum Gauges.....	5-11
5.3.2.5 Voltmeter Gauge.....	5-13
5.3.2.6 Ammeter Gauge.....	5-14
5.3.2.7 Fuel Level Gauge.....	5-16
5.3.2.8 Pyrometer	5-17
5.4 Troubleshooting Procedures for the SMC	5-19
5.4.1 SMC Pointer Never Moves.	5-20
5.4.2 Speedometer and Odometers Inaccurate	5-21
5.4.3 Speedometer Accurate, Odometer Inaccurate.	5-21
5.4.4 Odometer Advances When PTO Engaged	5-22
5.4.5 Speedometer Does Not Change Speed When Two-Speed Axle Engaged	5-23
5.4.6 Engine Hours Do Not Advance.	5-24

Model 387 Instrument System Service Manual

5.5 One or More Gauge Pointers Sweep	5-25
5.5.1 A J1708 Data Bus Gauge Pointer Sweeps	5-26
5.5.2 A Non-J1708 Data Bus Gauge Pointer Sweeps	5-26
5.5.3 Several (But Not All) Gauge Pointers Sweep	5-27
5.5.4 SMC Pointer and All J1708 Data Bus Gauge Pointers Sweep	5-27
5.5.5 All J1708 Data Bus Gauge Pointers (Except the SMC Pointer) Sweep	5-29
5.5.6 All Gauge Pointers Except the SMC Pointer Sweep	5-30
5.5.7 Only the SMC Pointer Sweeps, and No Messages Appear	5-32
5.5.8 SMC Pointer Sweeps, and a NO DATA Message Appears.	5-32
5.6 Warning Messages	5-33
5.7 Backlighting Problems	5-34
5.7.1 Two-Inch Gauges	5-34
5.7.1.1 One Gauge Has No Backlighting	5-34
5.7.1.2 More Than One Gauge Has No Backlighting	5-34
5.7.1.3 All Gauges Plus Tachometer Have No Backlighting.....	5-35
5.7.2 SMC Has No Backlighting	5-36
5.8 Select/Reset Switches not Working	5-36
5.9 Wiring Diagrams	5-38

6 Using the Handheld Diagnostic Tool 6-1

6.1 Care and Cleaning	6-1
6.2 Description	6-2
6.3 Reading Engine ECU Gauge Data	6-3
6.3.1 Procedure.	6-3
6.4 Reading Private Bus Gauge Data.	6-6
6.4.1 Procedure.	6-6
6.5 Viewing Configuration Data	6-8
6.5.1 Procedure.	6-8
6.6 Programming and Verifying Ports 5A and 5B	6-10
6.6.1 Procedure	6-10
6.7 Programming the Main Transmission Temperature Warning LED	6-13
6.7.1 Procedure	6-13
6.8 HDT Spare Parts	6-16

Notes:

Model 387 Instrument System Service Manual

1 Introduction

1.1 Purpose and Scope

The purpose of this manual is to provide Peterbilt with the knowledge required to produce their own repair procedures. This manual contains the technical repair information necessary to diagnose and repair the Model 387 Instrument System (also referred to as simply the "instrumentation"). The information in this manual is not proprietary and can be used as Peterbilt sees fit.

The manual describes how to operate, service, and troubleshoot the instrumentation installed in vehicles that broadcast engine- and speed-related information over a public data bus (the SAE J1708 data bus). For information about the vehicle's Electronic Control Unit(s), wiring diagrams, the SAE J1708 data bus, external sensors and other components that are not part of the instrumentation, please refer to the appropriate vehicle service documentation.

1.2 How To Use This Manual

The manual is divided into six chapters:

- **Introduction** - Contains a brief introduction to the product and to the manual itself.
- **Operation** - A complete operator's manual. Written for the vehicle operator, this chapter describes how to use the instrumentation and how to interpret the information it presents. If you are going to operate the vehicle, you should read and understand the information in this chapter.
- **Functional Description** - Describes the components that make up the instrumentation and how they communicate with other systems in the vehicle. An understanding of the information in this chapter will help you diagnose and find problems in the instrumentation. If you are going to service the instrumentation, you should read and understand the information in this chapter.
- **Service** - Describes how to remove, disassemble, and reinstall the components of the instrumentation. It contains a spare parts list, and other important information. Do not service the instrumentation until you have read and understand the information in this chapter.
- **Troubleshooting** - Provides detailed troubleshooting information that will help you identify faulty components within the instrumentation.
- **Using the Handheld Diagnostic Tool (HDT)** - Describes the operation of the handheld diagnostic tool used to help diagnose problems with the instrumentation.
