ENGINE PARTS MANUAL

Introduction

This manual covers the Yanmar 3TNV88-BKMS/4TNV88-BKMS and 4TNV88-BDMS engines (P/N 192473/192474, and 192494, respectively), used in Gehl 3640/3840/4240 and Mustang 2026/2041; and Mustang 2044/2054 skid-steer loaders, respectively.

When ordering service parts, specify the correct part number, full description, quantity required, and the engine model number and serial number.

Items shown that do not have a part number are shown for reference purposes only and are not available for purchase. Part numbers may change. Your Gehl or Mustang dealer will have the latest part number.

Gehl® Company and the Mustang® Manufacturing Co., Inc., reserve the right to make changes or improvements in the design or construction of any part of the unit without incurring the obligation to install such changes on any previously delivered units.

IMPORTANT

For maximum engine life, when shutting the engine down, allow the engine to idle, without load, for five minutes. This will allow engine components that operate at high temperatures to cool slightly before the engine itself is shut down.
