Programming Flash EPROMS with ZF Test Program.....	40
Description of Test.....	40
Outgoing Inspection	40
Clutch Actuator	41

This manual is intended for skilled personnel trained by ZF Friedrichshafen AG to carry out maintenance and repair work on ZF products.

This manual deals with a ZF product in accordance with the state of development on the date of issue.

However, due to continuing development of the product, repair work might require work practices and test or adjustment data which are not contained in this manual.

We therefore recommend that work done on your ZF product is carried out only by skilled mechanics and fitters who have had their practical and theoretical knowledge updated on a regular basis at our After-Sales Service training courses.

Service points equipped by ZF Friedrichshafen AG all over the world offer you:

1. Well-trained personnel,
2. Specified equipment,
e.g.: Special tools
3. Genuine ZF spares, according to
our latest specifications

All work performed at these service locations is carried out conscientiously and with care.

Warranty:

Repair work carried out at ZF Service Points is subject to the contractual conditions prevailing in the individual case.

Damage resulting from work performed by non-ZF personnel in an improper and unprofessional manner, together with follow-on costs caused by such work, is excluded from the contractual warranty agreement.

This also applies where genuine ZF spare parts have not been used.
